**What is the top priority in your riding? What do you intend to champion when elected?**

From speaking with people at the doors, it is clear that healthcare must be the top priority. Many residents do not have family doctors, our ERs are not reliably open, mental health programs are underfunded, home support services are understaffed, and wait times for necessary tests and specialist appointments are unacceptable. Since the early 2000s, every professional association involved in healthcare has been warning that our system was headed for a breaking point. Previous governments failed to listen, and now we are in a crisis.

My own recent interactions with the healthcare system, involving my family, pushed me to step forward and

put my name forward to represent Boundary-Similkameen. I believe that the Conservative Party of BC's Patients First Plan is a comprehensive healthcare reform that will prioritize investments in frontline services, reduce administrative burdens, and ensure that wait times are reduced—so that when my family, or yours, needs help, it will be there.
